Re: Watershed Protection Videos – Pennichuck Brook

Dear Mr. O'Mara:

Pennichuck Water Works (Pennichuck) is pleased to announce the release of a series of four brief watershed protection educational videos now available on our website for viewing. This project was funded by Pennichuck and the NH Department of Environmental Services (NH DES) through the NH DES Source Water Protection Grant Program and produced by Pennichuck.

The purpose of these videos is to educate residents about the Pennichuck Brook Watershed and what can be done to help protect it. These brief 2-3½ minute videos highlight potential threats to the Pennichuck watershed and water supply focusing on stormwater, includes examples of watershed improvement projects Pennichuck has completed through the years, and provides information on what residents can do to help protect the Pennichuck Brook Watershed and water supply.

The NH DES has asked that we contact you and request that you consider posting a link to these educational videos for your website visitors to view. The videos can be found at: www.pennichuck.com/watershed_videos.php, including an ADA compliant version with subtitles. The videos include:

- Segment 1 - What is a watershed and stormwater
- Segment 2 - How stormwater impacts a watershed
- Segment 3 - What Pennichuck has accomplished in the watershed through the years
- Segment 4 - What can you do to help protect the watershed

We hope you will consider this opportunity to provide not only watershed education but stormwater outreach to area residents. Please feel free to call me at (603) 913-2330 with any questions or concerns.

Sincerely,

Donald L. Ware

Donald L. Ware, P.E.
