

# Repairs Waiver Request Form Septic System Ordinance

Address of Project: \_\_\_\_\_

Applicant \_\_\_\_\_

Date \_\_\_\_\_

When an existing septic system is proposed to be repaired or replaced, the applicant may request in writing to waive specific requirements of the Septic System Ordinance as they pertain to the specific property. The applicant shall present reasons in writing why the waiver is needed in accordance with Article XII.E of the Septic System Ordinance.

The Zoning Administrator and Health Officer may grant a repair waiver to provide reasonable and functioning facilities where in the opinion of the Administrator, with the agreement of the Health Officer, the mandatory requirements of these Septic System Regulations would impose an unnecessary hardship upon an applicant proposing to repair or replace an existing septic system, provided that such waiver will not have the effect of nullifying the intent and purposes of the Zoning Ordinance or the Master Plan.

All approved Repair Waivers shall be noted on the plans, indicating the paragraphs waived and a general description of the waivers.

Repairs Waiver - Please provide a brief description of the waiver request:
