Subject: Pipeline Issues

Board Members,

Below is correspondence sent to Gov. Hassan on behalf of our town. In addition I am in the process of establishing whether or not NESCOE is an agency NH needs to fulfill its obligations to the public.

I will also try to stay on top of the SEC and Utilities Commission actions and attempt to insure Amherst' values are fully considered.

Thanks to the Pipeline Committee for their work.

Rep. Peter T. Hansen

Governor,

On behalf of Amherst citizens AND the Board of Selectmen,I urge you to reconsider NH's membership in NESCOE.NESCOE appears to be somewhat of a self appointed jury on what is best for NH citizens including telling our electric utility owners they MUST help in the development of natural gas pipelines. That is NOT the NH way and it is readily apparent that if the pipeline companies require financial support for their business then they hardly qualify as candidates for assurance that should a disaster occur they could fulfill their obligations. Amherst residents are capable of supporting, through private investment, companies they believe worthy. We will not be forced to do so by state agencies.

Respectfully,

Rep. Peter Hansen

Hills Dist 22 Amherst
