To: Planning Board, Town of Amherst NH

Re: Support Letter for Carter Scott & Jacobson Farm Development

Dear Planning Board Members:

I am writing today to voice my support for the above-mentioned project, as well as the leader of the development, Carter Scott.

I am the sole owner of *Energy Vision Homes* who design and build *Zero Energy* and *Passive US* Homes in central and southern NH. As a member of the team working on the Jacobson Farm Development, I have interacted with Mr. Scott for past 5 years. We share a passion and drive to **change the way homes and communities are designed and built**. As a PhD trained Environmental Scientist, I would lead the effort to incorporate innovative construction techniques and sustainably sourced materials to build energy neutral, healthy, and durable buildings that minimize construction impact on our natural world in every home that is constructed in the development.

If approved by the Planning Board, the Jacobson Farm Development will be a model for future development in the state and beyond by demonstrating that homes and communities can be created in a way that preserves our natural resources.

Sincerely,

John F Slater
